

Versa's commitment to improving the impact on the environment through its activities is reaffirmed and its environmental policy is based on the following principles :-

- (1) In all areas of activity Versa Ltd will operate in full compliance with the laws of the United Kingdom and all countries with which Versa Ltd trades.
- (2) Versa Ltd will operate with honesty and integrity in all areas of activity.
- (3) Versa Ltd places great emphasis on the health and safety and protection of employees.
- (4) Versa Ltd is committed to achieving progressive improvements in its environmental performance.

## **General Environmental Policy**

Energy efficiency and improving the efficiency of manufacturing processes and office energy consumption.

## **TRANSPORT EFFICIENCY**

Improving delivery schedules and co-ordinating activities.

## **WASTE EFFICIENCY**

Reducing material waste by introduction of new manufacturing systems and incorporating preferred stock sizes and lengths.

## **PACKAGING**

On-going review of packaging materials.

## **AIR QUALITY**

Constant assessment of emissions from timber processing and batching process to maintain standards required of current legislation.

## **PURCHASING POLICY FOR TIMBER**

Versa Ltd only sources from suppliers who, operate within the laws of their own country, specifically those laws concerning forest management and development, and implement verifiable documented forest management schemes including replanting programmes. Recycled materials will be offered as an alternative material whenever possible.
